

# Solution Sheet

## Research & Development

**NEED:** After spending hundreds of thousands of dollars on designing and building a custom golf course our client wanted to make sure that the original design was maintained despite years of use.

**SOLUTION:** GDM scanned the greens of the course as it was originally built. Not only can these models be used for greens study, but the models can be used to monitor changes in the greens' geometry due to play, mowing, fill settling, etc..

**SPECIFICATIONS:** Scanworlds- 2-3 per Green  
Control- 4 Points per Green  
Fieldtime- 2 Hours per Green  
Client- Withheld per client's request
